

Blu Ray Disc support for Toast

- Toast

Toast 8 and higher offers complete Blu-ray disc support.

Toast 7 Titanium with Blu-ray Disc support is currently available exclusively through **OEM** (original equipment manufacturers) who are introducing Blu-ray Disc burners for the Mac. These OEMs include a full version of Toast 7 Titanium with this Blu-ray Disc support.

It is currently not available as a downloadable update to existing Toast 7 Titanium users, since the only additional functionality above our last update (version 7.1) is this Blu-ray disc support, which is only useful if you have a Blu-ray disc burner.
