Corel Digital Studio 2010

Patch Name Corel Digital Studio 2010 Service Pack 2Notes:	OS	Languages	
This patch is highly recommended for all users. It includes the following fixes	:		
 Major performance improvements - among other improvements, the application no longer hangs during cataloging when certain video file formats are found Printing disc labels - now includes support for several brands of label materials, making it easy to align the labels when printing. Simply select the "Commercial" option and choose your media type Create mode projects - month name on calendars no longer appear slightly in the spiral binding area; the first page image in photo books now line up correctly in the cover window; vertical collages print correctly; the option to start calendar weeks on Monday instead of Sunday now work in all languages Chinese-Traditional language in WinDVD - unreadable characters no longer appear in the user interface Photo date - pictures from cameras that do not set "date taken" in the file header will have this correctly added 	Windows	 English Deutsch Français Español Italiano ??? Nederlands ???? 	Download CDS_Patch2.exe (181 MB)
 Order Online - now working for U.S., Canada and Europe Upload to Flickr - send photos directly to Flickr 			
Released: 2009-11-13
