

WordPerfect Office X8 :How To Manually Remove WordPerfect Office X8

- WordPerfect Office Suite

Here are the instructions for manually removing WordPerfect Office X8 from your computer.

This article involves modifying the Windows Registry. It is recommended that you back up your registry before proceeding with this step. Follow the instructions in the following Microsoft KB Article for more information about the Windows Registry.

<http://windows.microsoft.com/en-US/windows7/Back-up-the-registry>

Alternatively, you can create a System Restore Point.

To create a restore point:

Open System by clicking the Start button , right- clicking Computer, and then clicking Properties.

In the left pane, click System protection. ...

Click the System Protection tab, and then click Create.

In the System Protection dialog box, type a description, and then click Create.

Use the Control Panel

Open your Windows Control Panel, and select Programs and Features

Select WordPerfect Office X8 from the list

Restart the computer

NOTE: If this step fails, proceed to the next step.

Delete the Program Files and Folders

This step removes any files or folders that might have been left behind after the previous steps. It is advised that you remove all the folders listed. If a folder appears on the list but not on your computer, proceed to the next folder in the list..

Using Windows Explorer remove the following folders and any subfolders that each might have:

C:\Program Files (x86)\Corel\WordPerfect Office X8

C:\ProgramData\Corel\Wordperfect Office X8

On your keyboard, hold the Windows key and press R

When the Run box appears, type in C:\Windows\Installer then press OK

Right click the following files and choose uninstall. Delete those that remain behind after performing this action or provide an error that "This function can only be applied to programs installed.
