

I just bought the Office Ready templates, where do I find the WordPerfect® Office Ready?

- WordPerfect Office Suite

After purchasing and downloading a WordPerfect® Office Ready solution pack you may receive the error "*Solution Pack installation cannot continue because an installation of WordPerfect OfficeReady was not detected on your computer*", when you click on the Icon for the solution pack.

To use the WordPerfect® Office Ready solution packs you will need the Template browser called WordPerfect Office Ready. The most current version can be downloaded for free from the following page: [WordPerfect OfficeReady](#)

To install the application:

1. Double-click on the file you have just downloaded **WordPerfect_OfficeReady1.5_CBP.exe**.
2. Follow the installation screens to complete the installation.

After the Office Ready application is installed, you will be able to install the template pack.
