

## WordPerfect X8: How to display or hide symbols in a document

- WordPerfect Office Suite

In WordPerfect, you have an option to show or hide symbols for spaces, hard returns, tabs and so on.

?

To enable the option, click **View ->Show** or you can use the shortcut key **Ctrl+Shift+F3**

?

Once you have the Show option enable, you will notice that your text will be surrounded by some symbols like a dot for spaces, arrows for tabs and this symbol for hard returns?

To disable this option, click click **View ->Show** or you can use the shortcut key **Ctrl+Shift+F3** again to turn it off. You will notice that when you enable the function, a check mark is placed to it's left, and when you disable it, the check mark disappears.
