

How to import video clips from a DVD disc.

- VideoStudio

How to import video clips from a DVD disc.

?

1. Open **Corel VideoStudio Pro X5**
2. Insert a DVD disc into the DVD drive.
3. Click on the **Capture Tab** ????????????????????????????????? ? ??
4. Click on the **Import from Digital Media** option ??
5. Click on the **Select Import Source Folders** ???????????
6. Add a check mark to the DVD drive with the disc in it and click **OK** button.

*It should show any combination of the two folders **Audio_TS** and/ or **Video_TS** under the DVD drive.?*

7. In the Import from Digital media window, click on the **Start button**.

**If you get a message window that states "There is no valid content", then it will indicate that the media disc or DVD is copyright protected along with the content that it holds.*

8. It will then bring up a new screen with previews of scenes from the DVD.?

?

?

9. Select the media clips you want to import by adding a Check to the box in the upper-left portion of each video preview, then click the **Start Import** button.

10. Wait until the import progress is finished.

?

After importing the video clips, the **Import Settings** window will appear. By default the **Capture to library** has already had a check mark included in the settings.

?

?

11. Click on the plus sign (+) to add a folder to your library in VideoStudio Pro.

12. Rename the folder and click the **OK** button.

?

13. To insert the imported video clip(s) directly to the timeline, simply add a checkmark on the **Insert to Timeline** option.

14. Once finished with the import settings, click the **Ok** button.

?

Note: All the imported clips will be added to the thumbnail list in the Library.
