

The 'Next' button is not active when creating a DVD, AVCHD or other disc in VideoStudio Pro X2 on Windows 7

- VideoStudio

After clicking on the option "Create Disc", the next button does not appear or is not active in VideoStudio Pro X2 on Windows 7. The "Back" button and the Project Settings may also be inactive or missing.

This problem only affects the display of the buttons. The menu and burning options are still available.

A patch is now available to fix this issue. It can be downloaded from our Patches and Updates website here: <http://www.videostudiopro.com/en/support/updates/default.html?pgid=800161&ppid=1300014>
