Corel® VideoStudio® Pro X10 Top Reasons to Upgrade

- VideoStudio

1. **New! Time Remapping**

Evoke drama by playing with speed. The new Time Remapping controls in VideoStudio Pro X10 make it easy to add impact with slow motion, speed things up, temporarily freeze the action, or even reverse and replay scenes. New Time Remapping controls puts all these controls in one place, so you can adjust speed without having to edit multiple movie clips and jump between windows.

2. **New! Track Transparency**

Let the best moments of your videos shine through with Track Transparency controls. New in VideoStudio Pro X10, these controls make it easier than ever to layer clips and adjust the opacity of your track to show multiple clips at once. Easily control transparency of each track directly from within the Timeline to let your best moments break through.

3. **New! 360° Video support**

Show your best angle with 360° video. VideoStudio Pro X10 introduces controls to convert your 360° video to standard video for playback on TVs and standard video players. Add your video to the Timeline and show your audience the exact point of view you want them to see. Then export it and playback as any standard movie.

4. **New! Group and Ungroup Clips**

Timeline editing is more powerful and efficient than ever with new grouping capabilities. Select your clips, then group or ungroup them just by right-clicking. Once clips are grouped, it?s easier than ever to move them along the Timeline seamlessly, or apply filters and effects just by dragging and dropping.

5. **Enhanced! Music library**

Now it?s a breeze to add custom-fit music tracks to your projects. In VideoStudio Pro X10, you can find all of the ScoreFitter tracks in the music library. Choose the track that best suits the mood of your video and it automatically adjusts to the length of your video.

6. **New! Performance and support**

VideoStudio Pro X10 continues to keep pace with the latest formats with expanded support for HEVC (H.265) encode for nVidia and AMD, offering a higher compression rate, better quality and a smaller file size. VideoStudio Pro X10 is optimized for Intel?s 7th generation processor.

7. **New! Integrated learning and tutorials**

Get help when you need it, right in VideoStudio X10, with the new Welcome book that offers instant access to helpful tutorials. Visit the Corel Discovery Center to explore a wide range of helpful and inspirational tutorials for new and advanced users. You can also view the User Guide online and access the Corel Knowledgebase to find answers to frequently asked questions.
