

Photo Album 6 - Activation

- Corel Other

Activating Photo Album 6:

If you have the trial version installed on your machine, you must remove/uninstall the trial, download the installer from your order receipt, then re install.?

After Installation.

Press **ALT+D** to register. You will then get a screen which will let you manage and download free content. When you have installed the content you want, close this window.

?

Launch the software

Close the software

You will get another prompt to activate the software from trial to full

Press **ALT+A** for **already purchase** then you should get a screen to activate the software.?

Click on activate.

This should now activate your software.?
