

Painter 2015: Color panel doesn't save between workspaces and close or relaunch of the application

- Painter

Description of problem:

1. Create new workspace
2. Click on clone color icon in color panel
3. Back to default workspace
4. Back to created workspace

Workaround:

Press the 'clone color' button in the color panel one or two times to re-sync the button with the brush. Do a brush stroke to confirm.
