CorelScript: Opening CSC files from CDGSX6.1 gives Run-time error 611

- CorelDRAW Standard

Anytime you get a script error when opening from the Recorder in Corel PHOTO-PAINT X6,

Do the following:

Edit the Corelscript in Notepad, From line,
WITHOBJECT "CORELPHOTOPAINT.AUTOMATION.16.1"
REMOVE ".1", so it reads like this:
WITHOBJECT "CORELPHOTOPAINT.AUTOMATION.16"

Save file and then open script in Corel PHOTO-PAINT X6.2 from the recorder docker, and play the script.
