CorelDRAW Technical Suite 2019: How To Manually Uninstall

Here is the procedure to uninstall CDTs 2019, including all locations where files/components may remain after a failed uninstall attempt

1. Restart your operating system to ensure everything is properly closed and complete any pending Windows updates successfully.
2. In Windows Control Panel, click Uninstall a program.
3. Remove these programs in this particular order, if installed.
 1. Corel Graphics - Windows Shell Extension
 2. Ghostscript GPL 8.64
 3. CorelDRAW Technical Suite 2019 ensuring that Remove User Files is checked.
If the option for ?Remove User Files? is checked, application user files such as workspaces, application preferences will be removed.
 4. XVL Player / XVL Player Pro
 5. XVL Studio 3D Corel Edition (may already be removed when successfully uninstalling the Suite)
4. It is also recommended that you visually inspect the installation and user folders, as well as the user location in the registry (if possible) for files and entries that may have been left behind. If they have not been removed during the uninstall process, they may need to be manually deleted.

Installer .msi components: C:\Windows\Installer folder

- This is a hidden folder, so you will need to type the path directly in a Windows Explorer window, or Run command.
- Set the display of the Windows Explorer window to show Details. Right-click on the column headings (e.g. Name) and enable the Title column. Click the Title heading to sort by title and scroll to the Corel installed applications.
- If there are any related **CorelDRAW Technical Suite 2019** .msi files, do not delete them, as they will need to be uninstalled one at a time. To uninstall them, right-click on each and choose ?Uninstall?. Repeat this until no more **CorelDRAW Technical Suite 2019** .msi files are listed

After the above steps, reboot the system and try to reinstall again.
