

CorelDRAW Home & Student: What happened to CorelDRAW Home & Student?

- CorelDRAW Standard

Corel recently introduced two new graphics products to offer an ideal solution for every level of expertise and budget.

For casual creative users looking to design impressive DIY graphics, we recommend CorelDRAW Essentials 2020 as an ideal and affordable tool to get started.

For home businesses and hobbyists looking for more creative power, including apps for vector illustration, layout, and photo editing, we recommend CorelDRAW 2020 Standard.

If you're looking for a complete professional graphics software solution, including applications for vector illustration, layout, photo editing, typography, font management, and the dependability of the Corel professional print engine, then CorelDRAW Graphics Suite 2020 is the best option for you. CorelDRAW Graphics Suite 2020 is available as either an annual subscription or perpetual license.

A comparison matrix of all three products can be found [here](#).
