

CorelDRAW.app Enterprise ? Notes for IT administrators

- CorelDRAW Technical Suite
- CorelDRAW Graphics Suite

Welcome to CorelDRAW.app Enterprise!

CorelDRAW.app Enterprise – as an add-on license option to CorelDRAW Enterprise licenses – allows the entire organization to collaborate on important design projects. Now everyone on the team – from content creators to contributors and reviewers – can open, view, annotate and print CorelDRAW designs, from any location, on any device.

With no installation required, CorelDRAW.app brings minimal IT administration and no maintenance effort. By activating your domain with the token received with the license purchase confirmation you have enabled your company's users to sign in to <https://coreldraw.app/?enterprise> with their corporate user accounts (Microsoft 365 or Google Workspace accounts) through Single Sign-on (SSO).

Please read through and follow the below steps to activate and configure your CorelDRAW.app Enterprise license (package) for the company users. This is a one-time operation, CorelDRAW.app Enterprise does not require any additional software installation, configuration or maintenance in addition to the below steps.

1) Activating CorelDRAW.app Enterprise in your corporate domain account(s)

The license confirmation is being received by email to the customer company contact that has been named in the license order. The license confirmation contains a unique token that you need to activate the licensed domain account(s) that were included in the license order.

The token directs to <https://cloud.coreldraw.app/corporatelogin>. By signing in to that page/token with your domain user account (Microsoft 365 / Google Workspace account) you will activate the CorelDRAW.app Enterprise license for the registered domain(s). At the same time, your user account will become the corporate admin user for the CorelDRAW.app Enterprise customer account.

As a corporate administrator for CorelDRAW.app Enterprise you can access the [admin console for your customer account](#) which provides control over user access within your CorelDRAW.app Enterprise customer account. Any user who has accessed CorelDRAW.app with their corporate user account (Microsoft 365 or Google Workspace) will be listed in the corporate admin console.

2) Configuring corporate cloud services for use with CorelDRAW.app

To get your company's users ready to use CorelDRAW.app Enterprise with your corporate cloud file sharing service, please follow the below/ linked instructions.

- [Configure Microsoft SharePoint, OneDrive Business and Microsoft Teams for CorelDRAW.app](#)
- [Authorize CorelDRAW.app to use Google Drive in Google Workspace](#)
