# Sign in out status does not update in open applications

- CorelDRAW Standard

Sign in/out status does not update in open applications:
For example, if there are 3 applications launched - CorelDRAW, Corel PHOTO-PAINT and Corel CONNECT, and the user signs out on one, they will be signed in on the remaining 2 applications until they are closed and re-launched. Same occurs on sign in.

To resolve the problem, close and re-launch remaining opened applications after signing in or out to update status.

Note: This issue has been fixed in CorelDraw X6.2 update.
