

How to resolve Error 998 in CorelDRAW

- CorelDRAW Standard

To resolve the Error 998 issue you would need to remove Searchqu Toolbar.

How to remove the SearchQu or SearchNu toolbar from your **ALL** existing browsers on your computer.

?

Note: This toolbar installs on all browsers regardless of the default browser you are using

?

Removing SearchQu/Nu from Google Chrome:

a. Click on **Customize and Control Google Chrome** button on the upper right side of the browser.

b. Click on **Settings**

?

?

c. Under **Search**, set the default search engine to **Google**, **Bing** or **Yahoo**.

?

?

d. Click on **Manage** search engines.

On the Search engines window. Delete Search Results.

e. Restart your browser.

?

?

Removing SearchQu/Nu from Mozilla Firefox:

?

a. Click on the **Firefox** button on the uppermost left hand corner of the browser.

b. Next, click on **Add-Ons**.

?

In the **Add-ons Manager** window, under **Extensions Tab**. Remove **Searchqu Toolbar 4.6.1.01**

?

d. Next click on **Options**.

?

?

e. In the **Options** window, the **Home Page** must be set to default.

?

f.??????? Restart your browser.

Removing SearchQu/Nu from Internet Explorer 9:

a.????? Click on **Tools** on the upper right hand corner of the browser and then click on the **Manage Add-ons** option.

?

b.????? Under **Toolbars and Extensions**, disable *DataMgr*.

?

c.????? Click on **Close**

d.????? Click on **Tools** on the upper right hand corner of the browser and then click **Internet Options**

e.????? In the **Internet Options window**, under **General tab**, set the default home page to any website you would like to use or you can use blank.

Once the toolbar is fully removed from your browsers, next step would be purging the system from SearchQU / SearchNU Toolbar.

?

1. ?Deleting Temp files

How To Remove Temp Files From Windows To Resolve Multiple Software And System Issues

?

2. ? Remove the toolbar completely from your system.

If removing the temp files still does not resolve the issue, your next step will be identifying if the toolbar is indeed installed on your system.

The toolbar is not listed under the Add/Remove function of Windows, you can find it under the following locations:
