3. Follow the instructions, review the Software License Agreement, and complete the installation.

If you encounter any technical difficulties installing this update, please contact Corel Support Services.

Corel AfterShot Pro Update 1.1.0.30

Hardware Acceleration?OpenCL

You can use OpenCL to access graphics card computing resources (GPU). Often this boosts the application's processing speed.

In the application, go to File > Preferences > Hardware Acceleration. It is important to review the information in the Hardware Acceleration panel to see if your system supports OpenCL and to learn how to get the best performance.

Enhancements

- Improved Sharpening algorithm
- Selective Color filter speed improvement
- New RAW default settings: RAW noise enabled
- Workspace changes for JPEG display
- Corel PaintShop Pro X5 auto-detect

Additional camera and lens support

- Nikon D3200
