Corel AfterShot Pro Update 2.0.1.5 Release Notes

Enhancements

- Added Sigma 30mm lens
- Added profile for Olympus 12-50mm

Issues addressed

- Local Contrast ? lines in preview (AMD Kaveri system, OpenCL enabled)
- Stability issue when exporting JPEG with Local Contrast applied (AMD Kaveri system, penCL enabled)
- Olympus OM-D EM1 RAW preview ? blue-tinged preview fixed

- GradFilter plugin ? now working with 32-bit version of AfterShot Pro 2
- Batch output presets ? performance issue addressed
- Perfectly Clear Noise Removal -- reset to default value fixed
- Fixed inconsistent naming of lenses between profile_micro43.txt and profile_olympuslenstable.txt
- Lenses ? corrected groupname for micro43 (Panasonic GF3 lens) in profile_micro43.txt
