

AfterShot Pro: Installation fails on Ubuntu 16.10

- AfterShot

Problem: Installation of AfterShot Pro fails on Ubuntu 16.10, it is recommended you follow the steps from the workaround below:

Cause: Some of the libraries are not available in the new version of the operating system.

Workaround:

Manually install libraries before installing AfterShot Pro

1. Reboot system to ensure all previous attempts to install the software are terminated.
2. Download and install the libraries, **in the same order specified below:**

<http://packages.ubuntu.com/xenial/amd64/libpng12-0/download>

<http://packages.ubuntu.com/xenial/amd64/libgstreamer0.10-0/download>

<http://packages.ubuntu.com/xenial/amd64/libgstreamer-plugins-base0.10-0/download>

3. Proceed to the installation of AfterShot Pro

AfterShot Pro will install successfully.
