

AfterShot Pro 3: Fails with ?no QT platform plugin? error on Fedora

- AfterShot

To test if this article applies to you:

1. Open a terminal window in Fedora
2. Run the following command: `/usr/bin/AfterShot3X64`
3. Look for ?This application failed to start because no Qt platform plugin could be initialized. Reinstalling the application may fix this problem? in the output.

To fix the issue:

You will need sudo permissions. Run the following command from the terminal Window:

```
sudo yum install compat-openssl10-devel
```

To Test the fix:

When the command is complete AfterShot will launch normally.
