

Aftershot Pro buffer copy for failed to write to pipe ESD version

- AfterShot

When Installing Aftershot Pro on a Linux based system and you receive this error:

```
<<<<<short read on buffer copy for failed to write to pipe in copydpkg-deb: subprocess paste returned error exit status 2dpkg: error processing AfterShotPro_amd64.deb (--install): short read on buffer copy for backend dpkg-deb during `./opt/AfterShotPro/lib/libQtHelp.so.4.7.3'Processing triggers for shared-mime-info ...Unknown media type in type 'all/all'Unknown media type in type 'all/allfiles'Unknown media type in type 'uri/mms'Unknown media type in type 'uri/mmst'Unknown media type in type 'uri/mmsu'Unknown media type in type 'uri/pnm'Unknown media type in type 'uri/rtsp'Unknown media type in type 'uri/rtspu'Unknown media type in type 'fonts/package'Unknown media type in type 'interface/x-winamp-skin>>>>>
```

This means that the program did not fully download and will need to be removed and redownloaded again.
