Corporate License Installation

- Corel Other

If you purchase a corporate license, you will need to purchase an **LMP** (Licensed Media Pack)

Corporate Licenses will start with the following prefixes:

WP15C22-XXXXXXX-XXXXXXX-XXXXXXX
DR15C22-XXXXXXX-XXXXXXX-XXXXXXX
TS15C22-XXXXXXX-XXXXXXX-XXXXXXX

Depending on your product and version, the number may be different.

Your Product Serial Number is a corporate serial number which when purchased, should have come with a License Media Pack (CD Installers for the program). Corporate serial numbers are only designed to work with the disc installer (License Media Pack) and do not require activation process. **This type of serial number will not work on a retail DVD, downloaded (ESD), or trial version.**

You would need to contact the reseller or vendor where you purchased the product and ask for a License Media Pack or media DVD for your software.
