Resetting VideoStudio Pro/Ultimate X9.

- Corel Other

Resetting VideoStudio Pro/ultimate X9.

Resetting VideoStudio Pro/Ultimate X9 to default settings requires renaming or removing a specific folder under the User Profile. This process resets the program library, so re-importing your videos, images or music files may be necessary afterwards.

To save the VideoStudio library:

- Click **Settings**
- Click**Library Manager**
- Click **Export Library...**
- Select a destination folder or create one
- Click the **OK** button

To Import the VideoStudio Library

- Click **Settings**
- Click **Library Manager**
- Click **Import Library...**
- Select the destination folder that holds the exported library information
- Click the **OK** button

Before performing this procedure, please ensure that Corel® VideoStudio Pro/Ultimate X9 is not running.

On Windows 8 and 10:

1. On the keyboard, launch the **Run** box by pressing the Windows button then the letter R (Windows + R)
2. In the Open box, type %APPDATA% and press the enter key.
3. In the new window, find the Ulead Systems folder.
4. Open the **Ulead Systems** folder.
5. Open the **Corel VideoStudio Pro** folder.
6. There should be a folder named **19.0** here.
7. Rename 19.0 to 19.0_old.

On Windows Vista / 7 :

1. Click on Start.
2. Click in the search box at the bottom of the Start menu.
3. Type in: %APPDATA% and press the enter key.

4. In the new window, find the **Ulead Systems** folder.
5. Open the Ulead Systems folder.
6. Open the **Corel VideoStudio Pro** folder.
7. There should be a folder named **19.0** here.
8. Rename 19.0 to 19.0_old.
9. Launch VideoStudio Pro/Ultimate X9.

Once the folder has been renamed, VideoStudio Pro X9 will now reset to its factory default settings when the program is launched.
