Pinnacle Studio 25: NewBlue FX Effects Support

- Pinnacle Studio

Installing Pinnacle Studio 25 on a system where Pinnacle Studio 22 or previous Pinnacle Studio versions are already present, Pinnacle Studio 25 shows NewBlue FX effects with watermarks.

NewBlue FX effects are not bundled with Pinnacle Studio 25. Importing NewBlue FX effects from Pinnacle Studio 22 and earlier versions are officially not supported, and there might be watermarks on NewBlue FX effects.

NOTE: If user has Pinnacle Studio 23 Ultimate already installed in the system, then Pinnacle Studio 25 installer will pick up NewBlue FX from there and display for use in Pinnacle Studio 25.
