

Pinnacle Studio? 25: Top Reasons to Upgrade

- Pinnacle Studio

Why upgrade from PS24 to PS25 - what's new?

1. NEW! Easily and quickly track any object in your video with Smart Object Tracking

(ULTIMATE EXCLUSIVE).

Edit more efficiently and save a lot of time with new Smart Object Tracking, intelligent, shape-aware motion tracking for masks applied on common objects. Now you can easily apply masks to objects in your video from pets and cars, to drones, and more. There is no need to re-create masks for each frame because smart technology automates the process by recognizing the original masked object and tracks it throughout the selected episode. Pinnacle Studio 25 Ultimate delivers this powerful new feature to elevate your editing experience and take it to new heights.

2. NEW! Create unexpected visual combinations with Blend Modes.

Improvise on the fly with Blend Modes and choose how one clip blends with another from creating a superimposed effect, to blending masked areas, or creating light bleeds or other color and exposure effects. Create natural combinations of clips, like flying birds over a landscape video or try your hand at contrasting combinations, like jumping dolphins over the night sky scene. Blend Modes boost your creativity and help to bring an artistic touch to your films.

Make your audio sound crisp, clear, and unique with new audio editing features added to Pinnacle Studio 25! Identify the noise profile and remove it with Noise Reduction to ensure your voiceover or musical track is perfectly heard.
