How to make AfterShot Pro the default program for JPG files

- AfterShot Pro

How to make AfterShot Pro the default program for JPG files

Resolution

1. Right-click on an image file and choose Properties from the context menu
2. Click on the “Change...” button
3. Click on More Apps
4. At the bottom of the list, click on “Look for another app on this PC”
5. Brose to This PC > C: > Program Files > Corel > AfterShot Pro 3 > Build
6. Highlight “AfterShot.exe” or “AfterShot”
7. Click the open button near the bottom right
8. Click OK
