CDGS 2022 Reasons to Choose (Existing user)

1. Faster photo editing

Create stunning images with more control than ever, thanks to our continued focus on building a non-destructive, contextual, real-time editing experience. Up to 10 times faster than before, the totally enhanced Adjustments docker/inspector in Corel PHOTO-PAINT™ includes additional adjustment filters and new editing options for existing filters to help you achieve superior results, faster.

Now that all adjustments are non-destructive, you can experiment endlessly, then reset or flatten with a single click. Rebuilt from the ground up, adjustment presets can be created in Corel PHOTO-PAINT using one or more filters and applied non-destructively. When you achieve a winning look, save the adjustment filter settings for handy reuse in other projects.

Organize presets into custom categories, or choose from a new collection of carefully curated preset styles. This exclusive new image adjustments workflow includes a number of additional, user-inspired enhancements to frequently used photo editing features, opening up a wealth of creative possibilities for subscribers.

2. Optimized learning experience

Ensuring your success is our number one goal, which is why we've personalized your learning experience to show you relevant tips and tutorials based on how you work and what you want to see.

Find your recommended learning content in the new Learn docker/inspector, and search online content as you create from the Explore tab. Thanks to optimizations that put tailored training at your fingertips, you'll be successful sooner without having to leave CorelDRAW® to brush up on tools and techniques.

3. Customer-inspired features

You deserve a graphic design solution tailored to your needs, with tools that work the way you want them to. Based on suggestions from our loyal users, we're proud to reveal a variety of enriched features in this latest release, from timesaving Multipage view and Pages improvements to valuable image editing and export enhancements. Add pages faster with less manual arranging, view and resize pages more naturally, and enjoy new support for TIFF, EPS, and SVG in the Export docker/Inspector.

To underscore our commitment to developing features that matter to you most, we've added a new product feedback loop. Now you can contribute to CorelDRAW® Graphics Suite's design and development by submitting your ideas as they arise and voting on others to bring them to life!
