

Quattro Pro font list in Format > Selection Properties is illegible

- WordPerfect Office Suite
- WordPerfect Home & Student

Symptoms

On high DPI systems with high display scaling percentages (eg, 300%), the font list may be illegible.

Cause

This is a known product issue which has been reported to our product development team for review and action.

Resolution

At present the only workaround is to use a lower display scaling percentage:

1. Right-click on the Windows Desktop
 2. Choose Display Settings
 3. Change the scaling to a lower value
