

CorelDRAW: No fonts were found

- CorelDRAW Graphics Suite
- CorelDRAW Home & Student
- CorelDRAW Essentials
- CorelDRAW Standard

Symptoms:

CorelDRAW crashes when launches with error message "No fonts were found"

or receiving error 5000.

Cause:

Corrupted Corel font database

Resolution:

Resetting the font database should fix the issue.

- Go to Start
- Click Run
- Type %appdata% and press Enter
- Open the Corel folder
- Right-click the FontDatabase and choose Rename
- Change the name to FontDatabase.old
- Hold down the F8 key on the keyboard.
- With the F8 key depressed, launch Corel Font Manager xxx.
- The following message will appear:
- Are you sure you want to overwrite the workspace with the factory defaults?
- Click Yes and release the F8 key.

Note:

xxxx- refers to CDGS version

Steps above works for CDGS 2017 and the latest version.
