

## **Uninstall procedure for Painter 2023 for mac**

- Painter

### **How to uninstall Painter 2023 for mac**

- Remove the Corel Painter 2023 launcher by dragging it to the Trash icon on the Dock or control+click > Move to trash.
- Remove the Applications > Corel Painter 2023 folder by dragging it to the Trash icon on the Dock.
- Remove the /Users/{username}/Library/Application Support/Corel/ com.corel.Painter2023, Painter 2023 and Painter 2023 Config folders by dragging it to the Trash icon on the Dock.
- Remove the /Users/{username}/Library/Preferences/ com.corel.Painter2023 folder and com.corel.Painter2023.plist by dragging it to the Trash icon on the Dock.
- From the Finder menu, choose Empty Trash.  
If you need to remove the serial number information (dta files, etc.) also remove this folder and subfiles
- {MainHD}/Library/Preferences/com.corel.Painter2023

#### **Note:**

To delete an item either drag it to the Trash or a quicker way is to use control+click > Move to trash.
