

## **Roxio products and M-Disc Support**

- Roxio Easy CD and DVD Burning 2
- Creator NXT
- Toast

## **Software support**

The ability to burn to M-Disc is not really dependent on the burning software but on your optical disc drive (ODD) or disc burner. If your ODD supports burning to M-Disc, i.e., it bears the M-Disc certified logo, then your burning software will see the M-Disc as just another recordable DVD or Blu-ray disc.

## **Hardware support**

Note that not all DVD writers support the M-Disc format. You need to make sure that it bears the M-Disc certified logo on it. *Most* Blu-ray writers, on the other hand, even without the M-Disc certified log, will be able to support the M-Disc format. So to be sure it does, it would be best to look at this [list](#) prepared by Milleniata to see if your particular Blu-ray/DVD writer is supported.

While not all DVD or Blu-ray recorders can write to an M-Disc, any DVD/Blu-ray drive can *read* an M-Disc.

## **M-Disc FAQ**

If you have more questions about M-Disc, kindly refer to this M-Disc [FAQ](#).
