8. Create smoother outcomes with transitions

Streamline your video storytelling with all kinds of unique transitions. Use Fade to Black, Crossfade, Dissolve, or wipes of different angles and shapes to add interest instead of sharp video cuts. Jump to the next level and unlock creative customization through the Camera Movements transitions with motion blur, plus newly added transitions with Instant Color Change, Parallax, or Split effect—each of them contributes to a more modern video aesthetic. Mimic impressive transitions from your favorite movies, create ones that blend scenes together, adjust them to look more natural or more dramatic—you decide the best way to add impact to your footage and make it look awesome.

9. Add motion and dynamics

Evoke drama in your storytelling with motion and speed effects.

- ◆ With Ultimate, you can customize built-in templates or create new Split Screen Templates to further combine multiple videos and graphics on screen.
