

How to install Corel PaintShop Pro 2023 Ultimate

- PaintShop Pro

Follow the steps below to install Corel PaintShop Pro 2023 Ultimate.

1. Run the downloaded installation file [PSP2023_Ult_DD.exe].
2. Click "Save" to extract the files for installation.
3. The folder will open.

If it does not open automatically, open the following path.

C:\Program Files (x86)\Corel\Corel PaintShop Pro 2023 Setup Files

4. Open the [PHOTO] folder.
5. Double-click [PSP2023_Ult.exe] to start the installation.
6. Enter your user name and serial number.
NOTE: Enter the user name and serial number using single-byte alphanumeric characters. No - (hyphen) is required.
7. Select either "Import user database information from previous version" or "Create empty user database information" and click "Finish".

Upon the first software launch, the End-User License Agreement will be displayed. Please read it over and click "Agree".

To start using the software, you'll need to either create a Corel account or authenticate using an existing Corel account.

- If you do not have a Corel account, enter the required information to create your Corel account.
- If you have a Corel account, check the "I already have an account" checkbox and enter the required information.
